

## ACTT Referral Form

### What is ACTT?

ACTT is a multidisciplinary clinical team that provides medical, counseling and case management services to assist individuals diagnosed with severe and persistent mental illness achieve stability in the community. The team consists of a psychiatrist, psychiatric nurses, clinical social workers, a substance abuse counselor, peer support specialist, team leader and program assistant who work together to provide services to the client. The goal of ACTT is to assist the client in maintaining his or her independence in the community and to remain out of the hospital. Services are intended to enhance overall quality of life through building self-confidence and competency across the domains of life functioning.

### ACTT Target Service Group:

- Individuals diagnosed with severe and persistent mental illness that have experienced difficulty demonstrating sustained therapeutic gains through traditional mental health services.
- Individuals who have experienced multiple psychiatric hospitalizations and/or judicial involvement.
- Individuals who demonstrate an inability to consistently perform daily living skills necessary for successful community living due to their severe and persistent mental illness.

### Contra-Indications for ACTT:

- Individuals with personality disorders who demonstrate significant pathology and social/relational instability.
- Individuals diagnosed with mental retardation and/or borderline intellectual functioning who demonstrate the need for habilitative (skill maintenance) vs. rehabilitative (recovery-oriented) services.
- Individuals for whom primary treatment issues are related to substance abuse and/or dependence.
- Individuals who have a history of malingering.
- Individuals who have a diagnosed organic brain syndrome limiting prognosis for treatment outcomes (i.e.: dementia, stroke, significant brain trauma, etc.)
